

FOR IMMEDIATE RELEASE:

MV Transportation, Inc. receives to Quality Service Award from Microsoft Corporation

Redmond, Washington -- October 5, 2007 --- During the 2007 Microsoft Vendor Program (MSVP) Excellence Awards recently, MV Transportation, Inc. took home the Quality Award for its outstanding performance and implementation of innovative technology applications on Microsoft's employee shuttle.

"This is a huge accomplishment for MV, and most importantly for the outstanding team of MV employees who worked tirelessly to make this project the enormous success it is," said Jon Monson, MV's Chief Executive Officer. "We are truly humbled by this award."

MV was one of six Microsoft vendors chosen from among the more than 15,000 that Microsoft works with in the United States to receive an MSVP Excellence Award. The MSVP Excellence Awards are handed out annually to vendors that consistently provide outstanding service and results to Microsoft. A panel of Microsoft executives selected this year's winners, which were nominated by Microsoft employees based on criteria such as value, quality, flexibility, innovation, security and privacy. The winners received their awards Friday, October 5 at the sixth annual MSVP Annual Vendor Summit, held on Microsoft's corporate campus in Redmond.

"Selecting the MSVP Award winners is always a challenge, and this year proved no exception," said Tim McBride, general manager and chief procurement officer at Microsoft. "It's my privilege to say that the six vendors we recognize today truly stand out, and the exceptional service they deliver is invaluable to our company and our customers."

MV assumed operation of the Microsoft Campus Shuttle in July 2005 from Laidlaw Transit Services. Shortly thereafter, MV transformed the service into a premier, fully automated service, according to Microsoft officials. Taking advantage of Microsoft technologies, MV developed a data-driven technological solution geared toward customer satisfaction. MV's system, which includes a unique and interactive dispatch center integrated with Microsoft MapPoint(R) software, offers Microsoft employees the most progressive campus shuttle service in the country.

About the Microsoft Vendor Program

Established in 2002, the Microsoft Vendor Program is designed to enhance Microsoft's relationship with a select set of vendors that are critical to the company, and to make it easy for Microsoft employees to work with prequalified vendors. More information on the program is available at <http://www.microsoft.com/procurement>.

About Microsoft

Founded in 1975, Microsoft is the worldwide leader in software, services and solutions that help people and businesses realize their full potential.

About MV Transportation

Based in Fairfield, California, MV is the largest private provider of paratransit services and the largest privately-owned transportation contracting firm in the United States. The company employs more than 11,000 dedicated transit professionals and operates more than 180 paratransit, fixed-route, shuttle and Medicaid contracts in 25 states.
