

FOR IMMEDIATE RELEASE:

MV Transportation, Inc. retains contract in Corpus Christi

(Corpus Christi, TX --- September 8, 2008) The Corpus Christi Regional Transportation Authority has again selected MV Transportation, Inc. to manage and operate its demand responsive and partial fixed route transportation – a \$16.5 million contract.

Under the terms of the five-year contract, MV will provide service to more than 16,000 passengers monthly – covering a service area of more than 800 square miles. MV will begin the new contract with the CCRTA on January 1, 2009.

“We are extremely proud to have retained this contract and maintained the confidence of the Corpus Christi Regional Transportation Authority,” said Alex Lodde, MV’s Founder and Chief Executive Officer. “We look forward to building upon the great relationship we share with our riders and local organizations.”

Over the past five years, MV worked in partnership with the Authority to increase on-time performance, improve the maintenance program, and implement technology such as the DriveCam Video System to reinforce its focus on safety. Moving into the next contract term, MV will provide new options to increase customer service, technological innovations to enhance the overall transportation experience, and community outreach specific to the area. MV will also put new emergency precautions into place – including mock emergency drills, National Incident Management System training, and a customized hurricane plan.

This contract is one of two operated by MV in Texas. MV also operates and manages transportation services in the City of Port Author.

Based in Fairfield, California, MV is the largest private provider of paratransit services and the largest privately-owned transportation contracting firm in the United States. The company employs more than 12,000 dedicated transit professionals and operates more than 190 paratransit, fixed-route, shuttle and Medicaid contracts in 24 states.
